**DESCRIPTION**

Fast Grab Adhesive offers professional-strength and is specifically formulated for the installation of FRP panels over most porous surfaces. It is ideal for bonding FRP panels to drywall, non-treated plywood, concrete, and most other common porous building materials. It offers quick grab and strength development that requires minimal bracing. Fast Grab FRP Adhesive is a safer alternative to solvent-based technologies.

**SHELF LIFE/STORAGE**

When stored in its original, tightly sealed container, Crane Composites FRP Adhesive has a shelf life of two years (24 months) in unopened container - from the date of manufacture. See next page for assistance to determine date.

**APPLICATION TEMPERATURE**

Over 50°F and below 90°F for adhesive and substrates.

** FEATURES AND BENEFITS **

Achieves NFPA Class A fire rating
Requires Minimal Bracing
VOC-Compliant, Nonflammable
Quick Grab Formula
No Offensive Odor

---

**SERVICE TEMPERATURE**

0°F. to 110°F

**COVERAGE**

50 sq. ft. per gallon

**WORK TIME**

20 minutes at 70°F

**APPLICATION LIMITATIONS**

This product is for interior installations only. For best results, store Crane Composites Fast Grab Panel Adhesive above 50°F. Before installation it is important to wipe down all FRP with acetone if an oily residue is present as this can deter adhesion.
WORKING SURFACES
Surfaces must be free of any material that may deter adhesion, including severe and thick amounts of drywall joint compound. Patch large holes and depressions and remove any bumps, high spots, dust, oil, and grease. Cut and pre-fit all panels. Lay panels flat and let them acclimate to room temperature 24 hours before installing.

Note: Bracing may be required if walls or panels are not straight. Panels used in conjunction with channel moldings should NOT fit tightly into the moldings. Leave a small gap under the molding for expansion and follow panel manufacturer’s recommendations. Any holes drilled through the panels for fasteners, pipes or conduits should be oversized to allow for natural movement of the panel.

CLEAN UP
Tools and excess adhesive may be cleaned with water while wet. If adhesive has dried, use mineral spirits. Follow solvent vendor’s precautions when using solvents.

NOTE: Test solvent in an out-of-the-way area to make sure it will not mar or attack the surface.

CAUTION STATEMENT
WARNING: EYE AND SKIN IRRITANT. Do not swallow. Do not allow eye contact or prolonged skin contact. First Aid: If swallowed, do not induce vomiting; contact physician. If eye contact occurs, flush eyes with water for 15 minutes. Wash skin contact areas with soap and water; if irritation from eye and skin contact persists, contact physician. Product releases methanol during cure. For additional information, refer to Material Safety Data Sheet. KEEP OUT OF THE REACH OF CHILDREN.

MANUFACTURER DATE
The expected shelf life for unopened containers of Fast Grab (R53828) Adhesive is two years from the date of manufacture. The date of manufacture can be determined by the lot number stamped on the pail. Our lot number will start with an A, followed by several numbers. The first number will be the last digit in the year of manufacture. Products made in 2014 will have a 4. The next two numbers will indicate the month and the next two numbers will indicate the day. For example the lot number for product manufactured on April 15, 2014 would be A40415. Where the product is stored can affect the actual shelf life.
