

CRANE Gold

COILABLE EXTERIOR SIDEWALL PANELS

A durable, high gloss fiberglass finish, Crane Gold provides a radiant finish using our innovative resin gelcoat. Crane Gold is the newest preferred exterior finish by a broad range of manufacturers.

HIGH GLOSS SURFACE

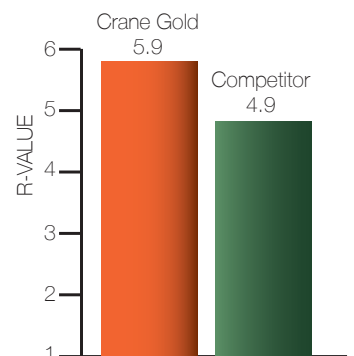

Crane's premium high gloss finish illuminates any surface in natural light. Crane Gold provides an R-Value that is typically a minimum of 10% higher than the competition.

QUALITY AND SERVICE

Crane Fiberglass is the best RV exterior on the market. No one else stands behind their product like Crane. Crane provides complete customer service from application engineering to warranty support and on-time delivery.

R-VALUE

Is a calculation of short wave and long wave structures identified using a wave-scan. The scale is based on a ranking system from 1(bad) to 10 (good). Standard originally developed by GM to measure paint surface quality. Applicable in measuring orange peel and fiber prominence of fiberglass panels. Laser profilometer that measures a surface's profile, in order to quantify it's roughness.

application:

recreational vehicles

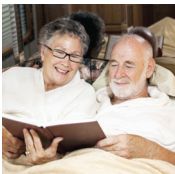

choose the right product
