

Alternate Adhesive Options for Crane Composites FRP

Monday, January 24, 2022

Crane Composites, Inc. is aware of the international FRP adhesive shortage impacting projects across the building products market. To assist our Glasbord® and Sequentia® FRP customers with installations during this challenging time, we have identified a variety of alternative adhesive products – in addition to our recommended Fast Grab & Advanced Polymer formulations.

List of suppliers and products Crane has evaluated:

| Adhesive Manufacturer | Substrate-Type | Product Code/Name | Description | Comments | Successful Lab Install |
|-----------------------|---------------------|-------------------|-------------------|--|------------------------|
| Henkel-OSI/Loctite | Porous Only | Power Grab | All Purpose Latex | FRP panels were installed without issues | Yes |
| Bostik | Porous Only | Bostik D-2001 | Ultra-Premium | Adheres to standard drywall | Yes |
| Mapei | Nonporous or Porous | Ultrabond | ECO 571 2K | FRP panel installed to drywall, ceramic and aluminum substrates without issues | Yes |
| Mapei | Nonporous or Porous | Ultrabond | ECO GPT | FRP installed over drywall, FRP, ceramic & aluminum, no issues | Yes |
| Mapei | Nonporous or Porous | Ultrabond | MS 4 LVT | FRP installed over drywall, FRP, ceramic & aluminum, no issues | Yes |
| Mapei | Porous Only | Ultrabond | ECO 901 | FRP panel installed over drywall without issue | Yes |
| Spray-Lock | Nonporous or Porous | FRP Adhesive | Aerosol Spray Can | Difficult to reposition; lays thin; only covers 2 sheets/can; cannot be frozen | Yes |

Crane Composites, Inc. makes no warranties, expressed or implied, regarding the fitness for use of any of these adhesive products, and highly recommends all customers review the technical data sheets (TDS) and follow the installation instructions from each adhesive manufacturer before applying on jobs. Customers are responsible for performing their own fit-for-use evaluation before proceeding with installation.

We will continue to evaluate adhesives and update customers as new information becomes available. If you have any questions, please contact your District Sales Manager or Customer Care Representative. Thank you for your support.
